

Rayan Mohammedameen

Full Stack Developer

I am a results-driven full-stack developer with one year of professional experience in web development, proficient in front-end and back-end technologies. My expertise extends to project management, Agile methodology, and quality assurance testing. I excel in effective communication with technical and non-technical stakeholders and have a proven track record of coordinating successful web development projects. I am committed to continuous learning and eager to contribute my skills to drive success in a dynamic work environment.

WORK EXPERIENCE

Full Stack Developer Zest property Inc.

9/2022 - Present

- Developed four automation tools using JavaScript, React, MongoDB, and Node.js to enhance the company's automation processes. These tools streamlined workflow, reduced errors, and increased efficiency resulting in a 65% improvement in automatic processes.
- Designed and developed three full-stack websites using MERN (MongoDB, Express, React, Node.js) and other technology stacks, delivering responsive and user-friendly interfaces. These websites boosted user engagement and increased site traffic by 20%.
- Led the planning of the entire application development process, meticulously creating comprehensive plans and strategies. Effectively translated conceptual ideas into well-executed products that not only met client needs but also surpassed their expectations.
